Hose reel

Quality compressed air where you need it, when you need it.

Hoses left lying around can present a tripping hazard and can be easily damaged, especially as a result of being frequently run over or stepped on – but it doesn't have to be that way!

Many KAESER MOBILAIR portable compressors are optionally available with a hose reel.

Take advantage of this handy accessory:

On-site flexibility

Hose reel holds 20 m of lightweight hose which does not have to be fully unreeled for operation

Maximum availability

Ready for use at any time, the hose is easy to transport and is safely stowed

Extended service life

Effective protection against bending, stretching and crushing. The compressed air and tools are therefore safeguarded against contamination caused by lax storage and careless transportation of loose hose

KAESER KOMPRESSOREN SE

The world is our home

As one of the world's largest compressed air system providers and compressor manufacturers, KAESER KOMPRESSOREN is represented throughout the world by a comprehensive network of branches, subsidiary companies and authorised partners in over 100 countries.

With innovative products and services, KAESER KOMPRESSOREN's experienced consultants and engineers help customers to enhance their competitive edge by working in close partnership to develop progressive system concepts that continuously push the boundaries of performance and compressed air efficiency.

Moreover, the decades of knowledge and expertise from this industry-leading system provider are made available to each and every customer via the KAESER group's global computer network.

These advantages, coupled with KAESER's worldwide service organisation, ensure that every product operates at the peak of its performance at all times and provides maximum availability.
